

Add a Virtual Mentor Upgrade to Your Participation Package

Hire an employee that works 24/7/365 to share your message in over 80 languages.

\$10,000 upgrade per year

The convergence of Extended Reality (XR), Virtual Reality (VR), and Artificial Intelligence (AI) presents a profound opportunity for establishing strong business alliances. Through strategic digital collaborations, businesses can drive innovation in customer experiences and next-gen personal devices.

This upgrade to your participation includes creation and hosting of your AI mentor. You will share the message you want the AI mentor to share and the FAQs and answers.

Your digital triplet can be a part of the digital SMART Community Conference Center, and directly on your own website.

- XR-based training programs elevate workforce skills.
- AI optimizes logistics and inventory management through data analysis.
- VR and XR offer immersive product experiences for enhanced customer engagement.
- AI-driven predictive analytics provide valuable insights for decision-making.

Moreover, the SMART Community Exchange Digital illustrates the potential of XR technologies beyond traditional video conferencing, fostering deep participant engagement and impactful problem-solving.

Digital triplets act as virtual advisors, simulating outcomes, offering transparent recommendations, and improving human-AI interaction across various sectors. Ultimately, digital triplets enable businesses to make informed decisions, promote collaboration, and fortify partnerships.
