

Forging the Transatlantic Bridge: A New Era for Allied Innovation

Connecting U.S. and European dual-use technology ecosystems for strategic advantage.

In an era of global competition, allied innovation must move at the speed of mission.

THE CHALLENGE

Fragmented markets, complex procurement, and misaligned capital prevent the best commercial technologies from scaling to meet critical security needs.

THE OPPORTUNITY

A dedicated exchange to bridge these gaps, creating a unified innovation corridor that supports U.S., NATO, and allied priorities for strategic trade and security.

A Partnership Forged in Expertise and Access

Smart Community Exchange (SCE) USA

THE U.S. ANCHOR HUB

Serves as the go-to-market partner for ventures targeting U.S. government customers. Provides access to secure labs, testbeds, readiness assessments, and advisory on government sales strategy.

Savukoski Arctic Research & Aerospace (SARA) Finland

THE EUROPEAN & ARCTIC GATEWAY

A mission-driven innovation hub advancing trade, technology, and security. Provides secure infrastructure and convenes public-private stakeholders to transition capabilities into operational environments.

Nordic Business Council USA

THE ECOSYSTEM CONNECTOR

Facilitates U.S.-Nordic trade by identifying aligned companies and delegations. Connects stakeholders including ministries, trade agencies, investors, and corporates.

We are building a bilateral framework to accelerate transatlantic technology ventures.

CONNECT

Build a transatlantic exchange connecting U.S., EU, and allied ecosystems in defense, cybersecurity, cybersecurity, resilient infrastructure, and critical technologies.

ACCELERATE

Speed international ventures into U.S. and European government markets with operator-informed go-to-market support.

ALIGN

Integrate capital, grants, and acceleration pathways into a unified, allied dual-technology fund & accelerator model.

SUPPORT

Advance U.S. Department of Commerce, NATO, and allied strategic priorities for international innovation and trade.

Our collaboration is built on interconnected pillars that provide end-to-end support.

Pillar 1: Venture & Technology Flow

Focusing on identifying, recruiting, and preparing high-potential companies through international delegations and venture acceleration programs.

Pillar 2: Ecosystem & Consortium

Concentrating on building a powerful network through an international consortium, strategic events, and executive roundtables.

Pillar 3: Capability & Resilience

Dedicated to enhancing allied strength through joint cybersecurity pilots, workforce mobility programs, and resilient infrastructure initiatives.

We identify, prepare, and propel ventures into allied government markets.

Targeted Missions

We curate bilateral trade delegations and themed missions in areas like cyber, energy security, and autonomous systems, tied to specific government demand signals.

Venture Readiness

We provide international startups and scale-ups with the technical, strategic, and regulatory guidance needed to meet government acquisition requirements.

Pipeline Development

We coordinate joint calls for applications, screening, and selection for thematic cohorts, leveraging the unique strengths of each partner's network.

We convene a powerful international consortium of leaders, innovators, and institutions.

Consortium Activation

We are forming an international consortium of companies, accelerators, research institutions, and government stakeholders focused on dual-use technologies.

Strategic Convening

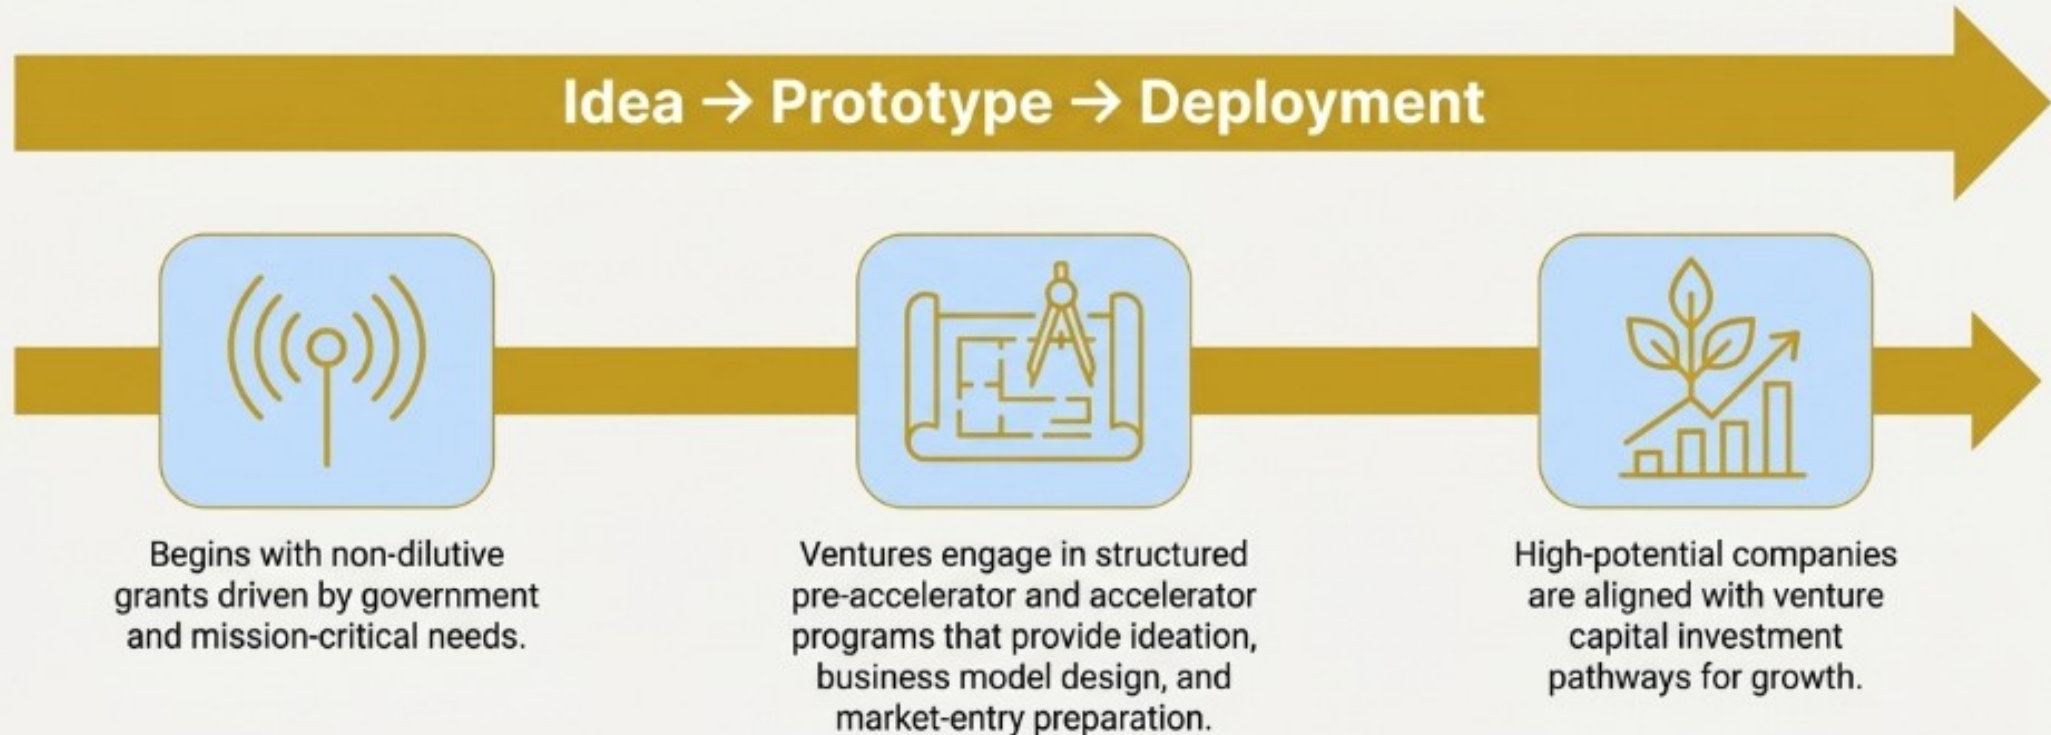

We co-host executive roundtables, innovation showcases, and investor briefings to foster connections and drive opportunities.

Strategic Alignment

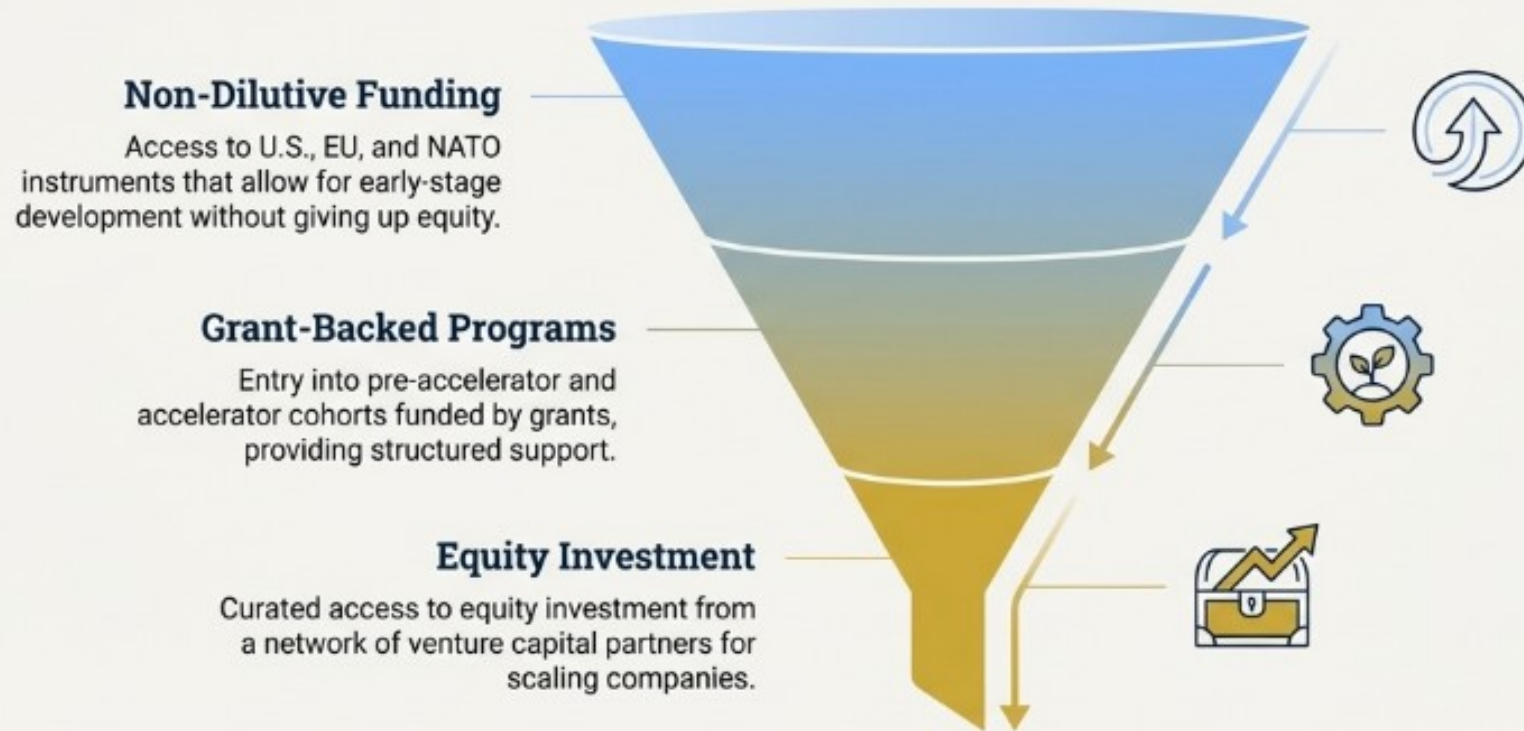

We align our programming with major U.S. Department of Commerce, NATO, and allied initiatives and flagship conferences to maximize impact.

We power growth with an ecosystem that integrates capital and acceleration.

The collaboration leverages an allied dual-use business & capital ecosystem that moves technology from idea to deployment.

We align ventures with the right capital at the right time

Your dedicated go-to-market partner for U.S. and European expansion

For Ventures Entering the U.S.

- SCE serves as your U.S. anchor hub, providing readiness assessments and advisory on government sales strategy.
- Access secure labs, testbeds, and demo spaces for pilots and experimentation.
- Connect with key DoD commands, federal agencies, and regional economic partners.

For Ventures Entering Europe & The Arctic

- SARA serves as your European gateway and commercialization partner.
- Leverage the Arctic Innovation Exchange (AIE) to foster sustainable trade, investment, and innovation ties with Nordic and EU stakeholders.

Join the leading transatlantic exchange for mission-driven technology.

For Startups & Scale-ups

Apply for upcoming thematic cohorts and venture readiness programs designed to prepare you for government opportunities.

For Investors & VCs

Access a curated and de-risked pipeline of dual-use ventures ventures prepared for complex public-sector markets.

For Government & Industry

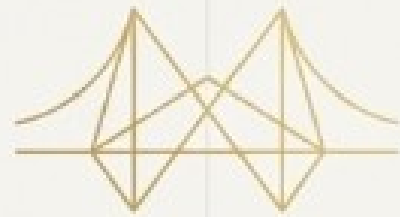

Partner with our international consortium on innovation challenges, cybersecurity pilots, and strategic trade delegations.

Together, we are enhancing our collective security and prosperity.

This partnership is building:

- A stronger, more integrated Nordic, U.S., and allied innovation ecosystem.
- Faster transition of critical capabilities from commercial innovators to mission operators.
- New opportunities for transatlantic trade, investment, and talent mobility.

Let's Build the Future Together.
